PROFILE

I am a **Software Engineering student** seeking a **Software Engineering / AI Internship**. I build full-stack web applications and AI-powered tools using **Python, JavaScript, and React**. I enjoy working with **LLMs, LangChain, and modern APIs** to solve real problems. I am eager to learn, collaborate with teams, and contribute to production-ready projects.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, FastAPI, Flask

Full-Stack: MERN Stack (MongoDB, Express.js, React, Node.js)

Databases: MongoDB, MySQL, Vector Databases

Libraries & Tools: Pandas, NumPy, Streamlit, pdfplumber, python-docx, Git, Jupyter Notebook

Concepts: REST APIs, ETL, Data Parsing, Full-Stack Development, RAG, Agile Collaboration

EXPERIENCE

Internship | Orizon Technology, CTBE |

2024 – Present

- Completing my internship at **Orizon Technology**, where I Participated on a **Full-stack** development projects.
 - Collaborated with peers to design and build full-stack web applications using the **MERN stack** (MongoDB, Express.js, React, Node.js).
 - Developed **RESTful APIs** and integrated frontend components with backend services.
 - Participated in **code reviews, pair programming, and sprint planning** within a small development team.
 - Gained hands-on experience with **Git, team workflows, and building projects from idea to deployment**.
-

PROJECTS

AI Resume Builder |

Personal Project

- Built a full-stack **AI-powered resume builder** using **Flask, Tailwind CSS, and Google Gemini 1.5 Flash**.
 - Integrated **LangChain** for a natural-language chat assistant that edits resume content on demand.
 - Implemented resume import and parsing for **PDF, DOCX, and TXT** files using pdfplumber and python-docx.
 - Designed **5 ATS-friendly resume templates** with live preview and dynamic template switching.
 - Added **PDF export** functionality for professional, print-ready resume downloads.
 - Applied secure file handling, session management, and environment-based configuration.
-

Evangadi Forum |

Institutional project

- Built a **full-stack** community Q&A platform (React + Node.js/Express + MySQL) with account management, question/answer CRUD, RESTful APIs, and JWT authentication.
 - Integrated **Google Gemini** to power an AI chatbot with **semantic search**, embedding forum questions as vectors and using cosine-similarity retrieval to surface relevant answers.
 - Engineered an end-to-end **RAG pipeline** over user-uploaded PDFs: document parsing/chunking, Gemini embeddings, top-k vector retrieval, and **citation-grounded** answer generation constrained to source context.
-
